

REDD+ Scorecard: 40th UNFCCC SBSTA, Bonn 2014

Issue / SBSTA Mandate	WWF REDD+ Expectations	Results	Score
Non-Market-based Approaches (NMBAs)		No consensus reached:	
Consideration of methodological guidance for non-market-based approaches;	 REDD+ can bring climate benefits in both, adaptation and mitigation, Parties should recognize and encourage the dual mitigation and adaptation benefits of REDD+ activities, when appropriate, when designing and implementing REDD+ strategies (e.g. in the form of joint mitigation and adaptation interventions at the national and subnational level). 	SBSTA to continue its consideration of the development of methodological guidance on NMBAs at SBSTA 41 (December 2014).	
Non-Carbon-Benefits (NCBs)			
Consideration of issues referred to in <u>decision 1/CP.18</u> , paragraph 40 (methodological issues related to non-carbon benefits resulting from the implementation of REDD-plus).	 Parties need to reaffirm the importance of incentivizing non-carbon benefits at the national/subnational level for the long-term sustainability of REDD+ activities by encouraging developing countries, which are implementing REDD+, to prioritize areas of intervention that can provide benefits beyond carbon. 	SBSTA agreed to continue its considerations of methodological issues related to NCBs at SBSTA 42 (May/June 2015)
