Emirates Wildlife Society is a national (UAE) environmental non-profit organisation established under the patronage of HH Sheikh Hamdan bin Zayed Al Nahyan: Ruler's Representative in the western region and Chairman of Environment Agency-Abu Dhabi. EWS works in association with WWF, one of the world's largest and most experienced independent conservation organisations, with over 5 million supporters and a global network active in more than 100 countries. EWS-WWF's mission is to conserve nature and reduce the most pressing threats to the environment by working with people and institutions in the UAE and region to implement conservation solutions through science, research, policy, education and awareness.

Published in June 2017 by Emirates Wildlife Society in association with the World Wide Fund For Nature – (Formerly World Wildlife Fund). Any reproduction in full or in part must mention the title and credit the above-mentioned publisher as the copyright owner.

TAKING BOLD COLLECTIVE ACTION

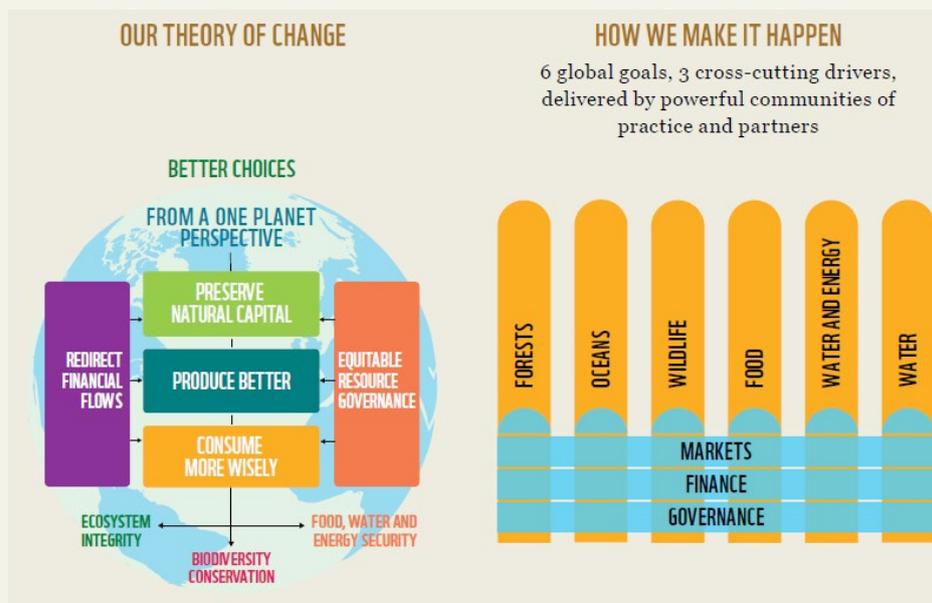

WWF has embarked on a journey of deep internal transformation that will make us stronger and more effective as we tackle the challenges and capitalize on the opportunities that lie ahead.

The time to act is now. We are putting in place a global conservation strategy that reflects the way the world is changing, meets the big environmental challenges of the age and helps us simplify, unite and focus our efforts for greater impact.

WWF will continue to deliver locally in crucial ecoregions around the world, but sharpen our focus on six global goals – on wildlife, forests, oceans, water, climate and energy, and food – and three key drivers of environmental degradation – markets, finance and governance. We are creating global communities of practice for each of the goals and drivers composed of specialists from WWF and key external partners. This will foster greater collaboration and innovation, incubating new ideas and taking promising ones to scale, as we unite our efforts toward making ambitious targets a reality.

We know that one organization alone can't effect the change needed. That is why our work on the goals and drives is strongly inclusive of our partnerships with institutions and corporations, both local and global. The changes we want to see in the world can only come about through the efforts of many actors: local communities and multinational corporations, governments and NGOs, finance institutions and development agencies, consumers and researchers.

There has never been a stronger sense of urgency for action. In WWF, we are defining new ways of working together to make a difference at a scale that matters. We know we must redefine humanity's relationship with the planet. And together we passionately believe we can.

OUR WORK WITH THE CORPORATE SECTOR

WWF's mission is to stop the degradation of the planet's natural environment and to build a future in which humans live in harmony with nature. As the [2016 Living Planet Report](#) demonstrates, the challenges that the global environment is facing today are too big, too interconnected and too urgent for any one organization to solve alone.

Therefore, WWF seeks to work with those who have the greatest potential to reduce the most pressing threats to the diversity of life on Earth and together find solutions to conservation challenges such as deforestation, over-fishing, water scarcity and climate change. Business drives much of the global economy, so we consider that companies also have a specific responsibility to ensure that the natural resources and ecosystems that underpin their business are used sustainably. Business is also primed to lead on rapid adaptation and on the innovative solutions needed to drive change.

By working with business, WWF aims to change behaviour and drive conservation results that would not be possible otherwise.

More specifically, our work with business aspires to do this by:

- promoting better production and responsible sourcing of raw materials that otherwise drive deforestation or unsustainable use of water;
- encouraging a switch to 100 per cent renewable energy and away from fossil fuels;
- engaging jointly on public policy;
- supporting the equitable sharing of natural resources;
- redirecting financial flows to support conservation and sustainable ecosystem management;
- raising awareness of the need to consume more wisely; and
- protecting some of the world's most ecologically important places.

We do this in a variety of ways, including supporting regulations that stop illegal or unsustainable activities, encouraging companies and industry platforms to make ambitious commitments and to engage in public policy discussions, and supporting credible certification schemes (e.g. [Forest Stewardship Council](#) (FSC), [Marine Stewardship Council](#) (MSC), [Aquaculture Stewardship Council](#) (ASC), [Roundtable on Sustainable Palm Oil](#) (RSPO), [Roundtable on Responsible Soy](#) (RTRS)). We also publish scorecards and reports on company or sector performance (e.g. [palm oil scorecard](#); [soy scorecard](#), and [sustainable cotton ranking](#)), mobilize public pressure through high-profile campaigns on issues related to business activities (e.g. [Seize Your Power](#), [Virunga](#), [Reviving the Oceans Economy](#)), as well as work in partnership with individual companies.

This report presents an overview of the partnerships that EWS-WWF has with individual companies.

Most of WWF's engagement with business is focused on these key themes:

- Food, forest and ocean commodities,
- Climate & energy, and
- Freshwater.

We work with key companies in priority commodity supply chains to reduce the impact of commodity production and drive demand for more sustainable commodities. Specifically, WWF focuses on the largest companies that buy and produce agricultural commodities, such as palm oil or cotton, that drive deforestation or unsustainable water use; on fish, both wild caught, such as whitefish and tuna, and farmed such as salmon and shrimp; and on forest products such as timber and paper. Our engagement with forestry companies includes participatory programmes such as the [Global Forest & Trade Network \(GFTN\)](#) and the [New Generations Plantations \(NGP\)](#) platform.

On climate change and energy management, WWF engages the corporate sector with the aim of catalysing the transition towards a low carbon future and supporting the implementation of the Paris Agreement. Working in partnership with leading companies through the [Climate Savers programme](#) and in multi-stakeholder strategic coalitions such as [We Mean Business](#) and the [Science Based Targets Initiative](#), WWF leads the implementation of a corporate climate leadership agenda, including the adoption of science-based emission reduction targets, the transition towards an economy 100% powered by renewable energy, and the responsible and transparent engagement of companies in climate and energy policy.

WWF's work on Water Stewardship promotes responsible business engagement on water issues. We define Water Stewardship for business as a commitment to the sustainable management of shared water resources in the public interest through collective action with other businesses, governments, NGOs and communities. It typically starts with improvements in water use and reducing water related impacts of internal and value chain operations, and progresses to influencing governance of the resource.

WWF'S CORPORATE PARTNERSHIPS

Our cooperation with partners is based on a common understanding of issues, shared ambitions or activities, and a willingness to speak out in public. In general, we distinguish three types of partnerships with companies:

1. Driving sustainable business practices;
2. Communications and awareness raising; and
3. Philanthropic partnerships.

Driving sustainable business practices

Our bilateral partnerships aim to deliver direct conservation results on key issues or in priority places by changing practices throughout a company's operations and value chain. These intend to reduce the major environmental impacts of some of the world's largest companies, achieve conservation results that would not otherwise be possible, and influence related sectors and markets.

Communications and awareness raising

The second way that WWF partners with business is by raising awareness of key environmental issues and mobilizing consumer action through communications and campaigns (including cause-related marketing campaigns). These partnerships also aim to highlight the beauty and uniqueness of places and species for which WWF stands. This approach includes, for example, consumer actions to encourage the purchase of sustainable products such as MSC-certified fish, or results in companies supporting campaigns that inspire action in favour of special places such as the Arctic or endangered species like the tiger.

Philanthropic partnerships

The third approach is articulated through specific programmes with companies to fund conservation projects and the institutions that deliver them. Philanthropic relationships with companies raise money for the conservation of key places and species, and the capability and tools to deliver such conservation.

WWF partners on a philanthropic or awareness-raising level with companies that are undertaking substantial action to improve their sustainability performance, or that have negligible environmental impacts.

As this report shows, many partnerships with companies use a combination of these approaches.

TRANSPARENCY AND ACCOUNTABILITY

Results and impact, both qualitative and quantitative, are essential. We advocate transparency in action by all stakeholders as a crucial step toward sustainability. We believe that accountability for results and transparency to our supporters and our members on how we deliver those results are key to our approach of working in a constructive, cooperative manner with all our partners, including business. We want all our partnerships with business to deliver the greatest impact possible.

All WWF offices are committed to continue or start reporting publicly on all our company relationships, their intent, objectives and impacts, of which this report is one part.

THIS REPORT

The aim of this report is to give an overview of the partnerships that EWS-WWF has with individual companies. Funds obtained through corporate partnerships are typically used by EWS-WWF to:

- Directly support activities across EWS-WWF's programmes in the UAE and gulf region,
- Creating opportunities to enhance awareness on sustainability obstacles and solutions and build the environmental capacity of companies,
- Support critical operational costs across the organisation

EWS-WWF is responsible for the agreements with the companies concerned for their work in the UAE or region.

WWF works with companies to achieve conservation goals. NGO and company partnerships involve engaging in constructive dialogue while challenging each other with real issues. As such, they involve opportunities and risks for both parties. At EWS-WWF, we manage the risks by having clear guidelines and criteria in place, including a due diligence process. In all relationships, we maintain and exercise the right to public commentary.

INFORMATION ON EWS-WWF CORPORATE PARTNERSHIPS

The following list of companies is an overview of all the corporate partnership that EWS-WWF had in 2016 with a contribution greater than EUR 25,000 (approximately AED 100,000). Details of each partnership can be found below:

Abu Dhabi Commercial Bank

In 2016 Abu Dhabi Commercial Bank (ADCB) continued its support as Pearl Member under the Corporate Membership Programme. This unrestricted contribution is used where most needed across EWS-WWF. Additionally, Abu Dhabi Commercial Bank implements an ATM micro donation initiative, where by bank customers have the opportunity to make a EUR 0.25 contribution during cash withdrawals towards EWS-WWF conservation work. This initiative empowers individuals to support sustainability in the UAE, while simultaneous raising awareness and increasing knowledge on environmental and resource issues. Abu Dhabi Commercial Bank first began supporting EWS-WWF in 2012 as a platinum corporate member and then becoming a 2013 project event sponsor of the Heroes of the UAE Private Sector Programme, which encouraged changing the behaviours of companies to improve water and energy emissions and savings.

Emirates NBD

Emirates NBD continued its support to EWS-WWF through the corporate membership programme and in 2016 they upgraded their membership from gold to platinum member. They also organised the first Desert Walk event for Emirates NBD staff. The event took place in the early hours of Friday, December 9th with 360 staff members trekking 5KM and 10KM routes through the desert, to connect with the UAE's natural environment and improve their physical health and relieve stress. Finishing the walk was not only an individual accomplishment, but also a charity initiative with Emirates NBD donating Dhs 50,000 to the Emirates Wildlife Society – World Wildlife Fund (EWS-WWF), to support their Terrestrial Conservation Programme. The event was such a hit that it will return in 2017 as a yearly event. To ensure that they left the desert exactly as they found it, in its pristine beauty, proper waste and recycling facilities were available.

Géant / Géant Easy

Hypermarket chain Géant/Géant Easy partnered with EWS-WWF to raise awareness on the negative impacts of plastic bags and encourage customers to switch to reusable bags and reduce consumption in support of a Use Less Plastic Bags campaign. Géant/Géant Easy asks customers to 'borrow' a plastic bag for a deposit of approximately EUR 0.05. If the bag is returned to Géant/Géant Easy, the deposit is refunded to the customer to promote recycling and discourage the use of plastic bags. Otherwise, Géant/Géant Easy contributes the deposits to EWS-WWF in support of all conservation initiatives in the UAE. Since 2012, Use Less Plastic Bags helped save a ton of plastic bags every month, resulting in a reduction of plastic bag consumption. Géant/Géant Easy has additionally stopped selling baby sharks and shark fin soups and promotes sustainable seafood options.

Husaak Adventures

In November 2016, Husaak Adventures successfully organised The Caracal Challenge event, the UAE's first ever 15-km desert excursion designed to enable the community to reconnect with nature and support environmental conservation across the Emirates. There were 400 individuals from across GCC participated in the event that tested their endurance. Participants navigated through Abu Dhabi's Al Khatim desert, using the moon and stars for navigation landscape at night and learned about the UAE's natural environment. EWS-WWF is the sole beneficiary of this event and the funds generated contributed towards developing a central biodiversity database, integrating protected area networks and building awareness around the initiative.

HSBC Bank Middle East Ltd

EWS-WWF started working with HSBC Bank Middle East in the UAE in 2005 on freshwater issues. The bank supported a biodiversity assessment of Wadi Wurayah, a mountain area with permanent freshwater resources that falls within the Arabian Highlands and Shrubs Eco Region, which resulted in declaring the area as the UAE's first mountain protected area. Now a recognised Ramsar site, EWS-WWF is working with the government to establish Wadi Wurayah as a world class national park and restore its biodiversity health. HSBC Bank Middle East continues to support the protection of Wadi Wurayah by funding the launch of its Water Research and Learning Programme, a part of its global water programme to promote freshwater conservation among its employees and the wider community. HSBC previously supported the expansion of the water and energy conservation campaign, Heroes of the UAE, to schools. It also supports the implementation of Eco-Schools, an education programme that builds environmentally responsible citizenship among students.

ITP Media Group

EWS-WWF received pro-bono communication and media exposure from ITP Media Group in the UAE. This included free advertising pages in consumer and trade publications, creative work, strategic development and strategic advice on brand communications. It is with their continued support that EWS-WWF is able to widen its reach to audiences across the UAE both private sector, NGOs and general public. They are a key partner in helping to reduce the operating cost of EWS-WWF through delivery of marketing and communication messages relating to programmatic goals, awareness and education campaigns and objectives related to its Mission.

Linklaters

In 2016 Linklaters continued its support to EWS-WWF through Corporate Membership Programme as Platinum member. This unrestricted contribution is used where most needed across the organisation. In addition, EWS-WWF received legal pro-bono support in relation to general commercial matter and particularly in respect to Wadi Wurayah National Park. Linklaters started its relationship with EWS-WWF in 2011 in which they have provided specialized camera traps to monitor wildlife in Wadi Wurayah National Park, the UAE's first designated Mountain Protected Area and helped set up the camera traps in its strategic locations within its vicinity.

Lush Fresh Handmade Cosmetics LLC

Lush Fresh Handmade Cosmetics has over 939 shops in over 50 countries worldwide. They believe in buying ingredients only from companies that do not commission tests on animals and have been fighting against animal testing since their early years when the brand started over 30 years ago as Cosmetics to Go. They invent their own products and fragrances and make them fresh by hand using little or no preservative or packaging, using only vegetarian and sometimes vegan ingredients. In 2016, Lush supported EWS-WWF Marine Conservation Programme through the Turtle Conservation Project. Lush adopted a turtle which they named 'Habibi' and raised awareness about marine conservation to their internal staff through a regional managers event.

The Sustainable City by Diamond Developer

The Sustainable City partnered with EWS-WWF to tackle climate change and promote energy conservation & solar power. Diamond Developers - the company behind the Sustainable City supports EWS-WWF's climate and energy programme for three years from 2016. EWS-WWF relocated its Dubai offices to Sustainable City and support the Development's sustainability performance through monitoring, reporting and verifying its greenhouse gas emissions. The partnership seeks to demonstrate how a low-carbon business model can be a transformational element for the future development of the UAE and contribute to economic growth. It also reflects EWS-WWF's vision to work with partners to address climate change and energy issues in the UAE.

Waha Capital

Waha Capital is an Abu Dhabi-listed investment company that offers shareholders and third-party investors exposure to high-potential opportunities in diversified asset classes. The Company manages assets across several sectors, including aircraft leasing, healthcare, financial services, energy, infrastructure, industrial real estate and capital markets. Waha Capital partnered with EWS-WWF in 2016 to support environmental education in UAE. Waha Capital wishes to act as a catalyst in promoting climate change issues through education and raising awareness in students who will then also act as environmental champions and leaders by sharing their knowledge with others and contributing to the national environmental knowledge building efforts. The research undertaken by students will at the same time contribute towards EWS-WWF Terrestrial Research Programme as well as monitoring of Wadi Wurayah National Park.

Yas Mall

Yas Mall is a new retail facility, having been awarded a 2-Pearl Estidama rating, Abu Dhabi's sustainable framework for design, construction and operation, equivalent to LEED. Yas Mall integrates a series of green strategies that make it a forerunner in the next generation of development in the Middle East. Yas Mall supported EWS-WWF conservation work through joining the Corporate Membership Programme as pearl member. In February 2016, the Great Green Race was held to raise awareness on the UAE's marine environment, it is a unique amazing-race style challenge for corporate squads of four to compete through an entertaining mix of physical and mental tasks requiring wit, speed and creative thinking. The event also included a green village inside the mall, consisting of a series of booths and activities further amplifying marine awareness raising opportunities to mall visitors throughout the entire day. Yas mall has recently signed a contract with us on helping reduce plastic bag consumption throughout their mall, with the support of its retailers.

EWS-WWF Initiatives Mentioned in this Report

1. Corporate Membership Programme

EWS-WWF's Corporate Membership Programme provides a network for companies in the UAE who wish to support EWS-WWF's work. Organisations can become members either through an annual fee, or as a complementary benefit of project sponsorship or pro-bono services. Membership does not create a formal partnership between EWS-WWF and the company, and does not imply an endorsement of any nature by EWS-WWF of the company or its products and services. It serves as a platform for companies to both contribute to sustainable initiatives in the UAE, as well as gain access to information, events and engagement activities to help raise a company's environmental capacity and awareness of issues relevant to the UAE.

2. Pro-bono services

EWS-WWF depends on the generous assistance of a wide range of supporters and partners to fulfil its mission. Pro bono contributors provide valuable expertise and resources to help build EWS-WWF's organisational capacity and impact, and enhance operations and communications. The type of assistance offered by our pro bono partners is diverse, ranging from media and advertising, goods and services, legal advice and event support.

3. Project sponsorship

Business partners support EWS-WWF through investments in specific conservation projects. Sponsored projects are an integral part of EWS-WWF's conservation work and can also promote environmental awareness and responsible environmental practice among customers, employees, industry leaders and other stakeholders.

4. In-kind project supporter

In-kind project supporters can help reduce EWS-WWF's operational costs as well as contribute items or services to specific EWS-WWF projects. This support is similar to the range of pro-bono services described above, however are allocated to a specific project.

5. External fundraising event organiser

In compliance with certain fundraising restrictions inside the UAE, EWS-WWF relies on the support of business partners to help facilitate the collection of contributions from the general public to achieve our conservation goals.

6. Philanthropic support from corporate associated foundation

EWS-WWF is pleased to receive a grant from Wells Fargo/WWF US (Apple UAE) and supporting its global conservation efforts focuses on marine preservation, climate change and energy among others.

7. ATM Micro Donation Scheme

ATM micro donations give cardholder a chance to donate 1 Dirham (EUR 0.25) during cash withdrawal transactions to EWS-WWF conservation activities. The scheme runs every other month, in rotation with the Red Crescent. In the case of Abu Dhabi National Bank, the contribution screen displays a different conservation theme each month, however collected funds are allocated to EWS-WWF overall efforts. For National Bank of Fujairah, funds are used specifically to support EWS-WWF's Terrestrial Conservation Programme. Beyond financial support, the banks play a role in helping to more widely disseminate awareness of EWS-WWF's conservation work.
