"Together possible." This is WWF’s call to action - a declaration that no one person or institution can save the planet by themselves. The threats are too large and the job is too big for us to go at it alone. But when we work together, anything is possible. Working together is how WWF means to achieve its ambitious goals for conservation in Laos. Whether it is fighting the illegal wildlife trade, building strong and resilient forest community networks, promoting a sustainable timber industry or conserving endangered species.

Partnerships are central to our work. This year, WWF-Laos continued and expanded its partnerships with Lao PDR Government agencies including the Departments of Forestry, Forest Inspection, Livestock and Fisheries, Industry and Handicrafts, of the Ministries of Agriculture and Forestry and Industry and Commerce. We also partnered with corporations, donors, communities and international donors and multilateral agencies. Together, we have achieved a lot.

The illegal wildlife trade is now a top priority for the Lao Government, illustrated by the May 2018 promulgation of Prime Minister Order No.5 on “Strengthening Strictness of the Management and Inspection of Prohibited Wild Fauna and Flora.” Enforcement actions are now ongoing. Such an achievement was made possible by the combined efforts of the Lao Government, WWF-Laos, and all our partners, including international development stakeholders and multilateral agencies.

In Nam Poui Protected Area, Asian elephants are thriving thanks to the relentless efforts of 15 rangers, who this year walked more than 700 kilometres patrolling the forest and catching wildlife offenders. Our sustainable rattan and bamboo initiative worked with provincial authorities to review the natural resources taxation framework in order to make the sustainable rattan business more attractive to community groups and Small and Medium Enterprises (SMEs). In the past 12 months, 29 fish conservation zones were created with the support of WWF Laos, amounting to the protection of an extra 182 hectares of the Mekong River mainstream.

Despite these accomplishments, threats still remain. Illegal wildlife traders are responding to law enforcement actions by switching to new modes of operation. Elephants in Nam Poui Protected Area continue to be targeted by organized poachers. Illegal logging decimates protected forests, and illegal fishing still destroys the efforts of local communities to protect their rivers and fish. Extinction is a very real risk that cannot be undone. Now more than ever it is time for all of us to unite and together, protect the natural wonders of Laos.

Phu Ma Nai in Xesap, National Protected Area, Central Annamites, Laos
RATTAN AND BAMBOO

10,949 ha FSC certified rattan forest maintained.

New forest patrol teams set up in 2 villages.

5,040 FSC rattan eastern baskets exported to Switzerland and
100 FSC rattan bags sold to WWF Switzerland’s online shop
by 2 CoC certified companies.

Business links created between community enterprises and one
Vientiane-based company to produce BBQ sticks and chopsticks
for the local market.

Natural resources taxes reduced by more than 75% in Bolikhamay
province, making sustainable rattan business more attractive to
community groups and SMEs.

Rattan and bamboo project MoU signed with National Agriculture
and Forestry Research Institute for a phase 5 in June 2018.

Rattan harvest quotas issued in May 2018.

State of the art land use planning completed in 3 villages.

1,116 ha of rattan and bamboo forest newly inventoried
in the Central Annamites Landscape.
