

WWF's new "Living Forest Report"
Chapter on wood products shows that
paper production and consumption is likely
to double by 2050. How to ensure this will
be done sustainably?

The WWF International Paper team
invites you to their event at Paperworld

**Monday 28 January 2013 -
Halle 3.C, West
(Room "Argument")**

10am - 11am

Forests products and the
environment by 2050:
WWF scenarios and tools to
achieve a sustainable future

11am - 12am

Refreshments and further
discussion opportunity with the
WWF International Paper Team

WWF also invites you to visit checkyourpaper.panda.org

The **CHECK YOUR PAPER** database, created by WWF, gives
easy public access to transparent paper brands, evaluated on the
most important environmental parameters. It is an on-line, global
reference tool for responsible paper producers and buyers who
want to promote supply chain transparency.
