WWF and The Forests Dialogue (TFD)
cordially invite you to attend
the side event:

PLANTATIONS FOR SUSTAINABLE PRODUCTIVE LANDSCAPES

Tuesday, 8 September, 2015
12:45 - 14:15
Mystrals Lower, Exhibition Centre

Planted forests continue to grow in both importance and extent. However, the establishment and management of plantation forests can be controversial. This event will highlight common themes emerging from the TFD, NGP, CIFOR and IUFRO work, and provide a forum for discussion of these issues.

Facilitator:

Peter Kanowski
Australian National University

Presenters:

Gary Dunning
TFD

Luis Neves Silva
New Generation Plantations (NGP)

Tim Payn
*International Union of Forest Research Organizations
(IUFRO)*

Pablo Pacheco
CIFOR

Antti Marjokorpi
*World Business Council for Sustainable Development
(WBCSD)*

TFD and the NGP platform are two international multi-stakeholder processes working to enhance the sustainability of plantations in landscapes. CIFOR and the IUFRO are global research organisations that offer a renewed focus on plantations in a landscape context.

This event will feature insight from these leading organizations and what role plantations can play in sustainable productive landscapes.
