JOB DESCRIPTION

Position title: Front-end Developer (Supply Chain Traceability)
Reports to: Chief, Strategic Communication and External Relations
Start Date: Immediately
Duration: 6 months contract

Technology is rapidly developing, and its potential use cases for conservation are immense. Are you interested in addressing important conservation issues through technology? Do you have a strong proficiency in front-end development? If yes, we are looking for someone experienced and passionate like you to achieve a tech-focused solution to help put a stop to deforestation!

Major Functions:

Unsustainable palm oil supply chains in rural Indonesia are fraught with illegality and deforestation. We are leading a technology-focused initiative to end illegal deforestation as efficiently as possible in two of the world's most important forests for biodiversity – Tesso Nilo National Park and Bukit Tigapuluh in central Sumatra, Indonesia.

Together with multiple palm oil experts based in WWF-Singapore and WWF-Indonesia, you will support this fast-paced, high-impact initiative and work dynamically in a team of five. In this project, you will help us change the way palm oil supply chains are managed through the use of data and technology. Our end goal is to end illegal deforestation in the palm oil industry. The team will be based in Singapore, and will require frequent travels to Sumatra.

Major Duties and Responsibilities:

- Develop new user-facing features
- Build reusable code and libraries for future use
- Translating designs and wireframes into high quality code
- Ensure the technical feasibility of UI/UX designs
- Optimize application for maximum speed and scalability
- Assure that all user input is validated before submitting to back-end
- Collaborate with other team members and stakeholders
- Design and develop mapping tools

Required qualifications:

- Minimum 3 years experience in developing front-end for applications
- Very good knowledge of JavaScript, HTML and CSS, there quirks, and workarounds
- Basic understanding of server-side CSS pre-processing platforms, such as LESS and SASS
- Good understanding of JavaScript frameworks like ReactJS
- Familiarity with RESTful APIs
- Proficient understanding of cross-browser compatibility issues and ways to work around them.
- A strong visual and technical portfolio.
- Great eye for detail and a strong sense of responsibility

- Knowledge of cartography is a plus

You need to:

- Be a self-starter with high level of drive
- Be able to work independently
- Have great organisational skills, attention and dedication to details
- Experience with working in small teams
- The ambition to develop well written and designed software
- Be comfortable with frequent travel
- Adhere to WWF's values, which are: Knowledgeable, Optimistic, Determined and Engaging

This job description covers the main tasks. Other tasks may be assigned as necessary according to organisational needs.

Interested candidates should email a CV and a cover letter with the title "Front-end Developer (Supply Chain Traceability)" to hr@wwf.sg.
Deadline for applications: 31 October 2018

About WWF-Singapore
WWF is one of the world's largest and most respected independent conservation organisations. Our mission is to stop the degradation of the earth's natural environment and to build a future in which humans live in harmony with nature.

As one of WWF's international hubs, the WWF-Singapore office supports a global network spanning over 100 countries. We help protect Singapore's essential needs through the actions of individuals, businesses and governments in the region. To meet key conservation goals, we address issues such as deforestation, haze pollution, food security, sustainable consumption and illegal wildlife trade.
