DESCRIPTION

Maderera Ipacara_ began its activities in 1992. Up until that time, the owner's investments were focused on cattle ranching and the extraction/industrialization of gum and Brazil nuts.

As part of its timber activities, the company installed a sawmill in the city of Ríberalta. In 1997 they adapted their work to the new rules established by the Forestry Law Nr. 1700 (favoring sustainable management), investing in new requirements like forestry inventories, general management plans, annual operative plans and others. In the same year the company acceded to a forestry concession that they named Ipacara_

with an extension of 30.113 hectares located in the Federico Rom_n province in the department (state) of Pando. In the year 2000 they installed another sawmill, but this time in the concession. At present both sawmills produce sawn timber for national and international markets.

ACTIVITIES

Field of activity	Share of business turnover (%)	Main equipment	Installed capacity
Sawn timber	70%	Sawmill 1 molding machine and flatter	2.000 m3/year
S2S	10%		
S4S	20%		

SPECIES Y VOLUMES

Common name	Scientific name	Current products	Volumes available (m3 / year)	Can volume increase?
Roble	<i>Amburana cearensis</i>	Sawn timber	300m3	400 m3
Cedro	<i>Cedrela odorata</i>	Sawn timber	100m3	150 m3
Paquió	<i>Hymenaea courbaril</i>	S2S	60m3	150 m3
Tajibo	<i>Tabebuia sp.</i>	S2S	60m3	230 m3
Aliso	<i>Alnus acuminata</i>	Sawn timber	250m3	350 m3
Cuta jaspeada	<i>Astronium lecontei</i>	Sawn timber	200m3	300 m3
Maní	<i>Pithecellobium corymbosum</i>	Sawn timber	200m3	350 m3
Almendrillo amarillo o garapa	<i>Apuleia leiocarpa</i>	S4S	250m3	500 m3
Toco colorado	<i>Parkia pendula</i>	Sawn timber	30m3	100 m3
Bitumbo	<i>Couratari guianensis</i>	Sawn timber		900 m3
Toco blanco	<i>Enterolobium contortisiliquum</i>	Sawn timber	30m3	120 m3
Isigo	<i>Tetragastris altissima</i>	Sawn timber		390 m3
Mara macho	<i>Cedrelinga catenaeformis</i>	Sawn timber	350m3	1.500m3
Mururé	<i>Clarisia racemosa</i>	Sawn timber	300m3	450 m3
Enchoque	<i>Cariniana micrantha</i>	Sawn timber		1.500 m3
TOTAL:			2.130m3	7.390m3
