

FIVE STEPS TO FIXING THE EU ETS

TODAY: ETS works for polluters

WHAT NEEDS TO BE DONE?

TOMORROW: ETS works for the climate

Paris pledge at risk

1
Cut emissions faster

Keep the Paris pledge

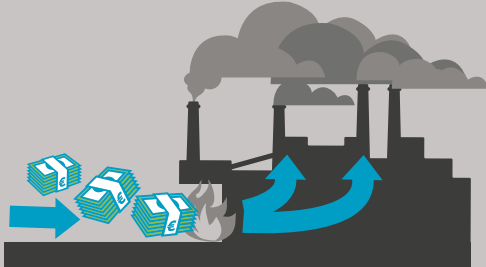

Surplus allowances can return

2
Scrap surplus allowances

Surplus allowances stay away

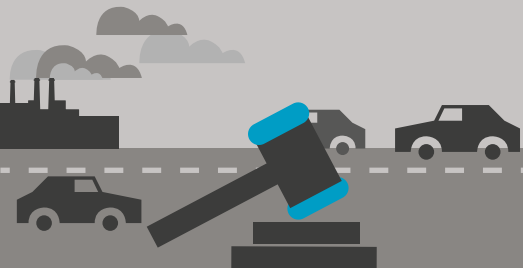

Polluters get paid

3
No more free allowances

Polluters pay

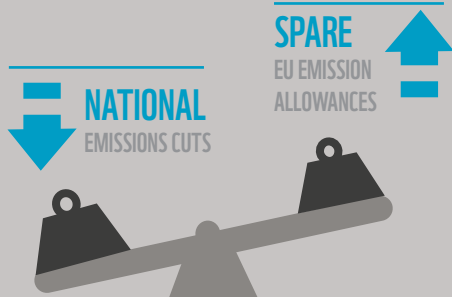

Limited revenues, badly spent

4
Auction all allowances, spend sustainably

More revenues, sustainably spent

Less emissions = more pollution permits

5
Let countries scrap allowances

Less emissions = fewer pollution permits
