Why we are here
To stop the degradation of the planet's natural environment and
to build a future in which humans live in harmony with nature.

WWF AFRICA CLIMATE CHANGE ADAPTATION STRATEGY

© WWF Madagascar

I. VISION AND GOAL

VISION

An Africa where people and nature have enhanced capacity and resources to adapt to climate change.

GOAL

By 2025, WWF Africa and its Partners are implementing climate smart conservation programmes and enabling climate resilient ecosystems and community livelihoods.

II. STRATEGIC APPROACH

To ensure that ecosystems and humans adapt to climate change, WWF's Africa Climate Change Adaptation approach is to:

- Strengthen Institutional capacity of partners
- Support national governments in the formulation and implementation of National Adaptation Plans (NAPs)
- Build capacity of WWF staff
- Strengthen the resilience of communities and ecosystems

III. THEORY OF CHANGE

In the face of a changing climate and related shocks and impacts, WWF seeks to enhance sustainable development by:

- Ensuring that all conservation work is climate smart by considering climate risks across all goals, outcomes, and activities and devising ways to manage those risks.
- Empowering CSOs and CBOs with climate information and the relevant vulnerability assessment and adaptation tools
