Countries agreed to keep warming below 1.5°C. With the current commitments we are on track for 3°C of warming.

**Work to be done on the road to a climate safe future**

- Fast ratification
- Delivering much more certainty and clarity on climate finance
- Developing the transparency framework necessary to build trust and confidence
- Proving that 5 year review cycles work by working on increasing INDCs in 2018
- Clear guidance for content of future INDCs
- Indicators and objectives for national action under the Global Adaptation Goal
- Clarity on how Equity and Fairness

**PARIS COP21 AGREEMENT**

Countries agreed to keep warming below 1.5°C. With the current commitments we are on track for 3°C of warming.

**COP 22 IN MARRAKECH**

Why we are here
To stop the degradation of the planet’s natural environment and to build a future in which humans live in harmony with nature.
